Dear San Jacinto River/Houston Ship Channel Community Members and Stakeholders-
The Galveston Bay Foundation (GBF) has updated the [San Jacinto River Waste Pits Superfund Site \(SJRWPS\) webpage](#):

- We have added EPA's presentation slides from their April 30th open house at the top of the webpage, under "Updates". They are in PDF format and are 7MB in size. Please note that slides 1-13 were from the formal presentation that evening. EPA referred to some of the subsequent slides when answering audience members' questions or when clarifying points.

All of the slides are very useful; they range from background on the site -to- sample results -to- **draft** cleanup alternatives. Please see slide 13 for a list of EPA contacts should you have questions. You are also certainly welcome to contact Jennifer Ronk, our technical advisor from the Houston Advanced Research Center at (281) 363-7927 or jronk@harc.edu or myself at the contact info below if you have questions about the site cleanup.

PLEASE NOTE that the latest information from the EPA indicates that the proposed plan for cleanup will be available for review and public comment in December 2015. We will update the GBF SJRWPS webpage with new information and documents as they become available and will provide you notice about any public meetings and the public comment period.

Please share this e-mail with your family, friends, and other members of the community and encourage them to contact me to be added to the mailing list.

Sincerely-
Scott

Scott A. Jones
